

ITP-System

COMPANY INTRODUCTION

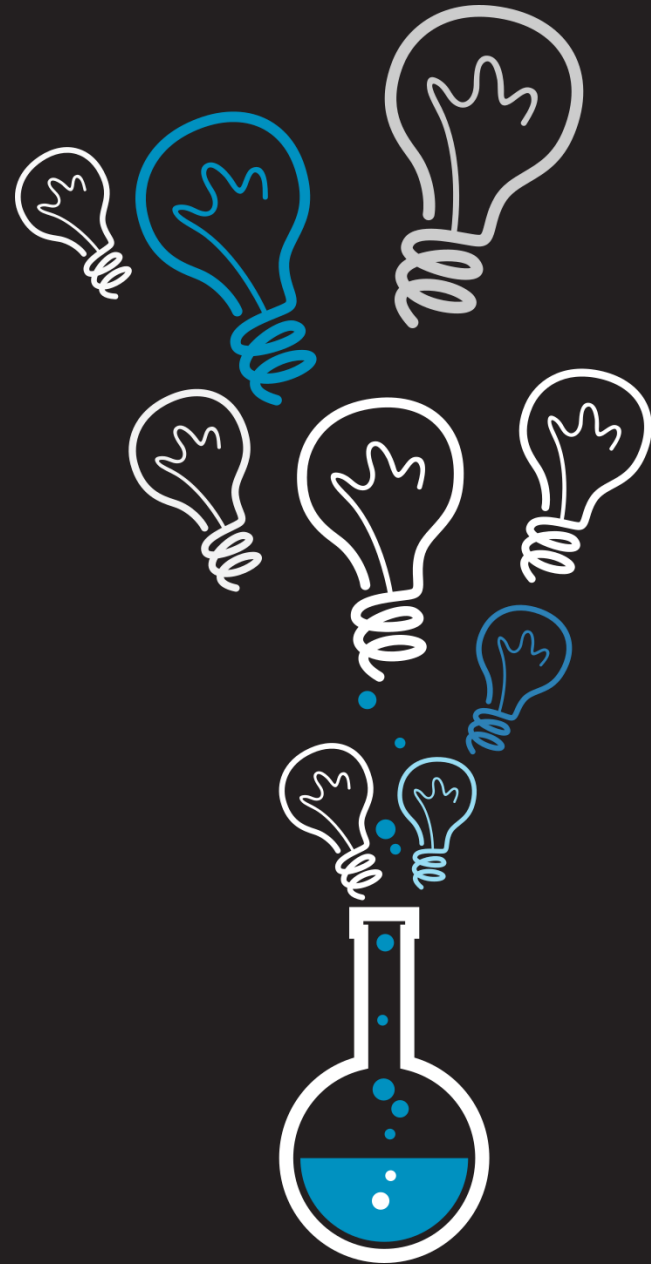

ITP-SYSTEM 2019

ITP-SYSTEM SP. Z O.O.

Our knowledge and experience allows us provide innovative solutions based on nanotechnology and material engineering for our customers. Our experience in application of modern technologies allows us understanding the needs of our partners, focus on important issues, and offer them best solutions. We combine the highest quality and technical support during application of our technologies. Thanks to that our partners get products with new properties and numerous competitive advantages.

Our business is focused on the synthesis of nano-compounds in the form tailored to our partners' needs and ready-to-use products based on nanotechnology achievements. We base on technologies developed entirely by Polish scientists. In our work we focus on providing the highest quality using environmentally friendly methods.

COMPANY TIMELINE

2014

R&D WORKS

The company was involved in intense research and development works with their technologies

2016

INCREASE OF OFFER

Rapid development of new products initiated by suggestions from customers

2018

TECHNOLOGICAL PROGRESS

Strengthening the position in market and development of new synthesis of nanomaterials and hydrophobic coatings

2013

COMPANY ESTABLISHMENT

The company was founded with support of science and technology park 'Technopark' in Gliwice

2015

MARKET START

Start of commercialization products developed in the ITP-System laboratory

2017

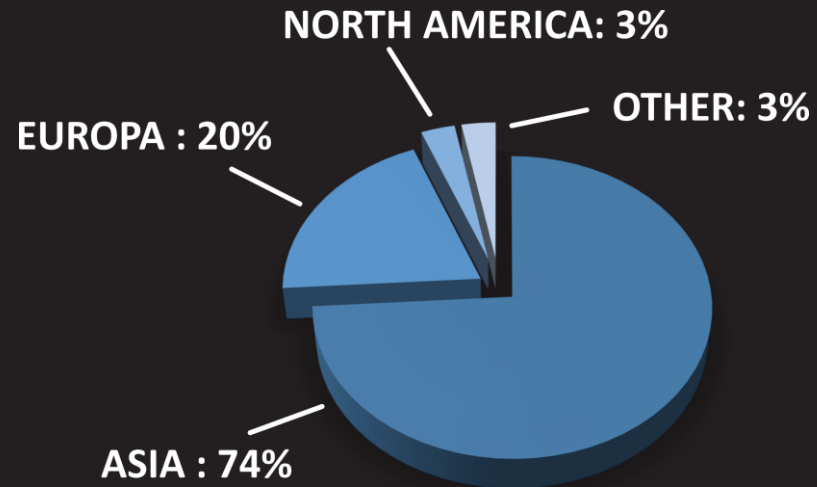

EXPANSION

Start with broad offer on the international market

STATISTIC FOR 2016-2018

MAIN EXPORT DIRECTIONS:

ITP-SYSTEM PRODUCTS ARE AVAILABLE IN ALMOST ALL CONTINENTS! (EXCEPT ARCTIC ☺)

PRODUCTS IN OFFER:

>100

SUPPORTED CUSTOMERS BRANDS:

>15

EXPORT SHARE:

36%

AVERAGE ANNUAL SALE GROWTH:

59%

OWN TECHNOLOGIES:

>25

ITP-SYSTEM

MAIN PRODUCTS GROUPS:

NANOSILVER

CAR CARE
PRODUCTS

PROTECTIVE
COATINGS

HOUSEHOLD
CHEMICALS

OTHER
NANOPARTICLES

HEATING
NANOCOMPOSITES

OEM PRODUCTION

The company's activity is focused on close cooperation with business partners. Most of our production appears on the market under our Partners' own brands. Thanks to this, we create products dedicated to specific market applications.

Our clients have the possibility to modify main parameters of the products we are manufacturing. It is possible to change the color, fragrance composition, content of active ingredients or packaging. In addition, in most products we can deeply modify the composition so as to eliminate allergens, solvents or add new functions, for example by adding silver nanoparticles (sanitary quality) or zinc oxide (removal of unpleasant odors).

RESEARCH AND DEVELOPMENT WORKS

The ITP-System company consistently works on expanding its product offer. Despite the position of one of the world leaders in the production of nanosilver, our laboratory constantly works on the applications of synthesized nanoparticles to final products. As a result, we are able to give the properties of microbial activity to practically any utility product.

In addition, we conduct ongoing research on superhydrophobic, photocatalytic, ceramic (quartz) and self-healing coatings.

Care for the natural environment motivates us to constantly search for ingredients and processes as safe as possible for our surroundings.

We also conduct research for our customers.
